

DELEGATIONS FROM SLOVENIA

My name is Neja Preložnik, I'm 16 years old and I go to II. gimnazija Maribor. This is my second time I will be participating in YPAC. I am an "editor in chief" in a press group this year. I'm interested in politics and environment. I like hiking, enjoying in nature and meeting new people.

I am Amadeja Rek and I am from Maribor. I am fifteen years old, so I am part of the Generation Z which will hold the responsibility for saving our planet in not-so-far future. I am freshman at II. gimnazija Maribor. My hobbies are videography and poetry. I have entered many competitions with my poems and won many awards. I love travelling. I have been to five European countries last year and I am planning to visit five more this year. I have a dog chihuahua who is my best friend. We need to save the planet now, because it will help us and other live beings.

My name is Klara, I am 16 and I come from Maribor (Slovenia). I like art and going outdoors and I am looking forward to participating at this year's YPAC as a delegate in Committee 3.

My name is Antonija and I am 17 years old. I come from Kamnik, Slovenia. This is my second year attending YPAC and I am looking forward to it. My hobbies are playing guitar and piano, video games and taking walks with my dog Luna. I hope the picture is alright. :)

My name is Marko Kotnik and I come from Slovenia. I am 16 years old and I go to Kamnik's grammar school. This is my first year participating in YPAC and I am already looking forward to it. I enrolled, because I think the whole idea of YPAC is really great. I also like this year's subject, because it can start many conversations and really makes you think about the future. In my free time I like to read and go to gym. My favorite subjects in school are mathematics, physics, biology and chemistry.

I am Manca Turšič and I am sixteen years old. I live in Slovenia and I am second year at GSŠRM Kamnik. This year I decided to join YPAC because I want to help find some good options how to help our planet or this particular area (Alps). My hobby is drawing and I train triathlon for 7 years now. I am really looking forward to meeting you all and I hope we'll find some great solutions for this years theme. Best regards, Manca Turšič
