

# FLYING FACTS

## Kamnik 2024

Dear Readers,

As a first-time press Editor in Chief, I have to say it was amazing, thanks to all of you. Everyone contributed a little something to this unforgettable experience. Without you guys, we couldn't have done it. I hope all of you made some nice memories, established new friendships, and had a great time here in Kamnik. Sadly, this year is my last time participating in YPAC. Having taken part in YPAC, I have made new friends, got to know the Alps better, learned about formal protocol, and learned new languages. I would recommend participating in YPAC to everyone. To the people who are familiar with the attention and also those who want to get rid of their stage freight. Also to the people who want to test out their skillset of foreign languages. The Kamnik delegation thanks you all for this amazing honor of hosting YPAC 2024. You've been amazing. Wish you all the best in Rosenheim next year!

Kind regards,

Žan Gerič, Editor in Chief

For the last time this year, welcome to the Flying Facts!

We have finished another YPAC with new experiences, challenges and friendships. After our General Assembly yesterday and the bowling competition at the WOOP you all deserve a week where you can just relax and look back on the week. Everyone of you has worked hard to make this year's YPAC as special and memorable as it was and I would like to thank all of you for your motivation and your will to make this world, or at least the Alpine region,

a better place to live in for us and future generations. Also thank you for being patient and happy to give your insights when the press needed another interview :).

I hope everyone had a good time and that I will see most of you again in Rosenheim next year! Thank you and have a safe trip!!

Best wishes,

Franziska Schroeder, Editor in Chief

# ABOUT OUR LAST DAY

## Exhibition

Yesterday the press group organized an exhibition of this year's resolutions and postulations in the main hall of the school.

Today this exhibition was the starting point of our discussions with CIPRA CYC (Cipra Youth Council) and EUSALP YC about the effects climate change has on water pollution and how we can protect our water resources more efficiently. We came up with a few possible solutions.

## Possible solutions:

- **Education:** same educational programme in every Alpine country
- **Solidarity:** ensuring cross-border participation to keep water resources protected
- **Communication:** sharing insights with friends and family members to spread awareness

## specific solutions/measurements:

- using less pesticides in agriculture to keep the ground water clean
- reducing meat in your everyday diet
- paying attention to everyday water usage

The exhibition and the discussion

# The General Assembly

Kamnik's delegation.

+Sonthofen, Chamonix and Trento who sadly had to depart before the closing ceremony

## Your press group of 2024!

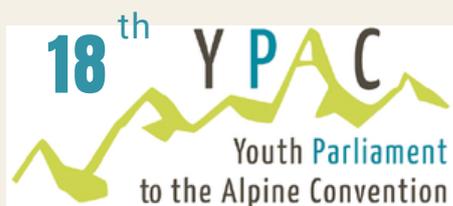

+Clément who sadly had to leave before we took the picture

From the Editors in Chief:

We would like to thank all our press members for their continuous hard work throughout the week and their ability to always write good and informative articles. You've been a great team and were always happy to fulfil every task we gave you. For those of you who spent their last YPAC with us this week, we wish you all the best for the future and for those of you who will be a part of the YPAC again next year, hopefully we'll see each other again in the press group!

Yours,  
Franziska and Žan

Thank you for everything, see you next year :)
